

ABSTRACT OF DISCLOSURE

Sub A2 A method for creating and recording management information for searching recorded digital data streams.

When a digital data stream is recorded on a recording
5 medium, index information for pointing to the location of
the time information corresponding to the first stream
object unit of each stream object on a time information
table is created and recorded. When reproducing or
searching the recorded digital data stream, a stream object
10 is found using the time information of stream objects and
the recording location corresponding to a requested search
time is found using the index information.
